

February 11, 1998

To whom it may concern:

Christopher Watkins has the greatest breadth and depth of any developer I've ever known – spanning seemingly unrelated fields to *produce* products for the real business world. His ethics and integrity in business and engineering make doing business with him a pleasure.

Given less than a week, and without our hardware, he produced a "mesmerizing" game demonstration that worked flawlessly on our first testing. We were especially pleased that he was able to incorporate our logos and rough game ideas on *such* short notice.

He rolled up his sleeves, and worked in the trenches with us, quickly and without error – effectively removing obstacles for us and making everyone look good. Accessible, calm and professional at all times, we knew we were talking to the business and engineering lead *all* in one. Ultimately Christopher Watkins' solid engineering produced a demonstration that sold machines and acquired distributors and investors.

Mr. Watkins had personal concern for the success of the project and its people. I recommend his services without reservation, especially for projects requiring *extreme* quality under strict time constraints. He quickly produces the most amazing products.

Sincerely,

Pat Jankowiak
Computer Engineer & External Engineering Coordinator
